MANAGED SECURITY

PROTECTING YOUR DATA, PROTECTING YOUR BUSINESS

How safe is your vital information?

What if your data was stolen? Or if confidential information was passed on to your competitors? Even if you have security measures in place you could still become the victim of a data breach, costing you time and money.

Managed Security helps to protect your systems, minimize data theft and safeguard your business by:

- Monitoring security of your systems
- Analyzing risks and threats
- Producing regular reports
- Running anti-virus software
- Protecting your email
- Offering consultancy support & advice
- Developing guidance and policies
- Testing your systems against hacking

We take away the worry of data theft, leaving you to concentrate on growing your business and increasing your revenues.

THE SOLUTION

We will monitor your systems, administer your protection and help plan your strategic approach to data security. 24/7.

Managed Security consists of three services:

SYSTEMS MONITORING	ADMINISTRATION	CONSULTING
Anti-virus	Email protection	Audits and strategic advice
Systems scanning	Malware prevention	Guidance and policy
Early warning signs of threats	Software security updates	Strategic security improvements

Systems monitoring takes a comprehensive look at your current systems and spots any threats – fast. Next, administration lets us manage all your security measures and keeps them up to date. And for total protection, our strategic consultancy services work with you in partnership to maximize the protection of your data.

MANAGED SECURITY
